

**FARMLAND CONVERSION IMPACT RATING
FOR CORRIDOR TYPE PROJECTS**

PART I (To be completed by Federal Agency)		3. Date of Land Evaluation Request		4. Sheet 1 of 1	
1. Name of Project Eisenhower Drive Extension		5. Federal Agency Involved FHWA			
2. Type of Project Transportation		6. County and State York & Adams, PA			
PART II (To be completed by NRCS)		1. Date Request Received by NRCS		2. Person Completing Form	
3. Does the corridor contain prime, unique statewide or local important farmland? (If no, the FPPA does not apply - Do not complete additional parts of this form). YES <input type="checkbox"/> NO <input type="checkbox"/>		4. Acres Irrigated		Average Farm Size	
5. Major Crop(s)	6. Farmable Land in Government Jurisdiction Acres: %		7. Amount of Farmland As Defined in FPPA Acres: %		
8. Name Of Land Evaluation System Used	9. Name of Local Site Assessment System		10. Date Land Evaluation Returned by NRCS		
PART III (To be completed by Federal Agency)		Alternative Corridor For Segment			
		Corridor A	Corridor B	Corridor C	Corridor D
A. Total Acres To Be Converted Directly		2.32			
B. Total Acres To Be Converted Indirectly, Or To Receive Services		0.00			
C. Total Acres In Corridor		2.73			
PART IV (To be completed by NRCS) Land Evaluation Information					
A. Total Acres Prime And Unique Farmland					
B. Total Acres Statewide And Local Important Farmland					
C. Percentage Of Farmland in County Or Local Govt. Unit To Be Converted					
D. Percentage Of Farmland in Govt. Jurisdiction With Same Or Higher Relative Value					
PART V (To be completed by NRCS) Land Evaluation Information Criterion Relative value of Farmland to Be Serviced or Converted (Scale of 0 - 100 Points)					
PART VI (To be completed by Federal Agency) Corridor Assessment Criteria (These criteria are explained in 7 CFR 658.5(c))		Maximum Points			
1. Area in Nonurban Use	15	5			
2. Perimeter in Nonurban Use	10	6			
3. Percent Of Corridor Being Farmed	20	9			
4. Protection Provided By State And Local Government	20	20			
5. Size of Present Farm Unit Compared To Average	10	10			
6. Creation Of Nonfarmable Farmland	25	0			
7. Availability Of Farm Support Services	5	5			
8. On-Farm Investments	20	3			
9. Effects Of Conversion On Farm Support Services	25	0			
10. Compatibility With Existing Agricultural Use	10	0			
TOTAL CORRIDOR ASSESSMENT POINTS		160	58	0	0
PART VII (To be completed by Federal Agency)					
Relative Value Of Farmland (From Part V)		100	0	0	0
Total Corridor Assessment (From Part VI above or a local site assessment)		160	58	0	0
TOTAL POINTS (Total of above 2 lines)		260	60	0	0
1. Corridor Selected:	2. Total Acres of Farmlands to be Converted by Project:	3. Date Of Selection:	4. Was A Local Site Assessment Used? YES <input type="checkbox"/> NO <input type="checkbox"/>		

5. Reason For Selection:

NOTE: Complete a form for each segment with more than one Alternate Corridor

Clear Form

CORRIDOR - TYPE SITE ASSESSMENT CRITERIA

The following criteria are to be used for projects that have a linear or corridor - type site configuration connecting two distant points, and crossing several different tracts of land. These include utility lines, highways, railroads, stream improvements, and flood control systems. Federal agencies are to assess the suitability of each corridor - type site or design alternative for protection as farmland along with the land evaluation information.

- (1) How much land is in nonurban use within a radius of 1.0 mile from where the project is intended?

More than 90 percent - 15 points
90 to 20 percent - 14 to 1 point(s)
Less than 20 percent - 0 points

- (2) How much of the perimeter of the site borders on land in nonurban use?

More than 90 percent - 10 points
90 to 20 percent - 9 to 1 point(s)
Less than 20 percent - 0 points

- (3) How much of the site has been farmed (managed for a scheduled harvest or timber activity) more than five of the last 10 years?

More than 90 percent - 20 points
90 to 20 percent - 19 to 1 point(s)
Less than 20 percent - 0 points

- (4) Is the site subject to state or unit of local government policies or programs to protect farmland or covered by private programs to protect farmland?

Site is protected - 20 points
Site is not protected - 0 points

- (5) Is the farm unit(s) containing the site (before the project) as large as the average - size farming unit in the County ?

(Average farm sizes in each county are available from the NRCS field offices in each state. Data are from the latest available Census of Agriculture, Acreage or Farm Units in Operation with \$1,000 or more in sales.)
As large or larger - 10 points
Below average - deduct 1 point for each 5 percent below the average, down to 0 points if 50 percent or more below average - 9 to 0 points

- (6) If the site is chosen for the project, how much of the remaining land on the farm will become non-farmable because of interference with land patterns?

Acreage equal to more than 25 percent of acres directly converted by the project - 25 points
Acreage equal to between 25 and 5 percent of the acres directly converted by the project - 1 to 24 point(s)
Acreage equal to less than 5 percent of the acres directly converted by the project - 0 points

- (7) Does the site have available adequate supply of farm support services and markets, i.e., farm suppliers, equipment dealers, processing and storage facilities and farmer's markets?

All required services are available - 5 points
Some required services are available - 4 to 1 point(s)
No required services are available - 0 points

- (8) Does the site have substantial and well-maintained on-farm investments such as barns, other storage building, fruit trees and vines, field terraces, drainage, irrigation, waterways, or other soil and water conservation measures?

High amount of on-farm investment - 20 points
Moderate amount of on-farm investment - 19 to 1 point(s)
No on-farm investment - 0 points

- (9) Would the project at this site, by converting farmland to nonagricultural use, reduce the demand for farm support services so as to jeopardize the continued existence of these support services and thus, the viability of the farms remaining in the area?

Substantial reduction in demand for support services if the site is converted - 25 points
Some reduction in demand for support services if the site is converted - 1 to 24 point(s)
No significant reduction in demand for support services if the site is converted - 0 points

- (10) Is the kind and intensity of the proposed use of the site sufficiently incompatible with agriculture that it is likely to contribute to the eventual conversion of surrounding farmland to nonagricultural use?

Proposed project is incompatible to existing agricultural use of surrounding farmland - 10 points
Proposed project is tolerable to existing agricultural use of surrounding farmland - 9 to 1 point(s)
Proposed project is fully compatible with existing agricultural use of surrounding farmland - 0 points

Eisenhower Drive Extension

FPPA Form NRCS-CPA-106

I. Assumptions Made:

- Based on discussions with the State Soil Scientist, the “site” was defined as the non-urban area, including non-farmland, directly affected by the proposed project.
- Part III.A Total Acres to be Converted Directly – acreage of Prime Farmland Soils within the non-urban area of the project site – 0.00 acre
- Part III.B Total Acres to be Converted Indirectly – acreage left unfarmable or inaccessible to farmer (Epley Farm) due to project – 0.86 acre
- Part III.C Total Acres within the non-urban area of the project site – 2.73 acre

II. Point Value Assignments

Rationale used to assign ranking of each criteria in Part VI. Information was obtained through field observations, aerial photographs, US Census Urban lands Map, and Google Map searches.

1. Area in Non-Urban Use – Approx. 50% of the land within 1 mile of the project is not within the US Census Urban lands boundary for Hanover, PA, and is in non-urban use – 5 points
2. Perimeter in Non-Urban Use – Approx. 60% of the project perimeter is in non-urban use – 6 points
3. Percent of Corridor Being Farmed – Approx. 50% of the site has been farmed more than 5 of the last 10 years – 9 points
4. Protection Provided by State and Local Government – Site is enrolled in Clean & Green and zoned for ag – 20 points
5. Size of Present Farm Unit Compared to Average – The farms within the site are the same size or larger than the average farm size for Adam County, Pa (142 acres), Epley Farm – 166.48 acres, Circle Oak Farm 141.77 acres – 10 points
6. Creation of Non-farmable Farmland – no farmland within the site will be made unfarmable as a result of this project – 0 points
7. Availability of Farm Support Services – All support services are available - 5 points
8. On-Farm Investments – minimal amount of on-farm investments - 3 points
9. Effects of Conversion on Farm Support Services – there would be no meaningful reduction in farm support services due to the project – 0 points
10. Compatibility with Existing Agricultural Use – The proposed project is a transportation use for an existing roadway and is fully compatible with the surrounding farm use – 0 points
